

X-Ray Viewing

Medilite X-Ray Viewers

Features

Provides a wide range of sizes and configurations.

Durable anodised aluminium finish.

Light-weight streamline design with rounded edges.

Internal baffle system for even light distribution.

Daylight fluorescent tubes are used, as they compliment the X-Ray film base, thereby maximising the clarity of the radiograph.

Unique top film-grip holder design ensures a light yet positive grip on films and is distortion free.

Recessed Perspex Panel.

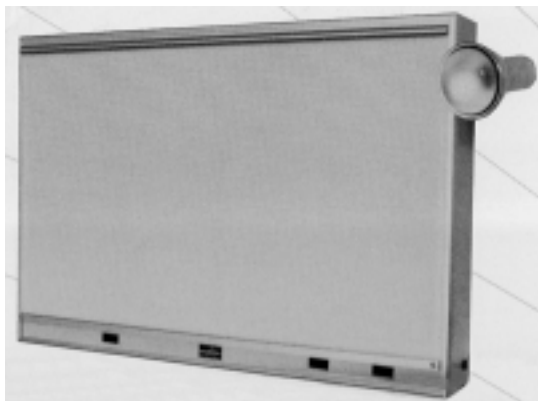

Rocker switches within recessed base panel.
