

Easy step guide to Waterless Hand Rub

1. Apply to visibly clean, dry hands. Dispense / pour sufficient volume of product into cupped hands ensuring fingernails are covered.

2. For effective hand disinfection, rub product vigorously over all surfaces.

3. Don't forget your thumbs and the webbing between the fingers.

4. Remember nails, both palms, fingers and backs of hands need to be covered. Finish at base of wrists.

5. Allow product to dry on your hands.
