

Issuing Date: 19-May-2021

Revision Date: 19-May-2021

1. Identification**Product identifier**

SDS Number: BXU566140
Product Name: 10% Glucose Intravenous Infusion

Other means of identification

Product Code(s): AHB0163

Synonyms: None

Recommended use of the chemical and restrictions on use

Product Use: Pharmaceutical.
Product Type: Injectable solution
Uses advised against No information available

Details of the supplier of the safety data sheet

BAXTER HEALTHCARE
33 Vestey Drive
Mt Wellington Auckland, 1060 New Zealand
Telephone: (09) 574 2400

Emergency telephone number

New Zealand: 0800 229 837 and Poison Information Centre 0800 764 766
Verisk 3E Global Incident Response Hotline +1 760 476 3962; Access Code 335625

2. Hazard(s) identification**GHS Classification**

Not classified

Label elements**Hazard statements****Other hazards which do not result in classification**

No information available

3. Composition/information on ingredients

Chemical name	CAS No.	Weight-%
Anhydrous Glucose 7625-23-2	7625-23-2	9-11
Water 7732-18-5	7732-18-5	90

4. First-aid measures

Description of first aid measures

General Advice	Treat symptomatically and supportively.
Inhalation:	If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention if symptoms occur.
Eye contact:	In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention if irritation develops.
Skin contact:	In case of contact, immediately flush skin with plenty of water. Get medical attention if irritation develops.
Ingestion:	Do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. If large quantities of this material are swallowed, call a physician immediately.

Most important symptoms and effects, both acute and delayed

No information available

Indication of any immediate medical attention and special treatment needed

Treat symptomatically. See patient package insert in shipping carton for complete information.

5. Fire-fighting measures

Suitable Extinguishing Media

Use extinguishing media suitable for surrounding materials.

Specific hazards arising from the chemical

No information available

Special protective actions for fire-fighters

Fire fighters should wear positive pressure self-contained breathing apparatus (SCBA) and full turnout gear.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Use suitable protective equipment (Section 8). Follow all fire fighting procedures (Section 5).

Environmental precautions

See Section 12 for environmental precautions.

Methods and material for containment and cleaning up

Methods for Containment:

If emergency personnel are unavailable, contain spilled material.

Methods for cleaning up:

For small spills add absorbent (soil may be used in the absence of other suitable materials) scoop up material and place in a sealed, liquid-proof container for disposal. For large spills dike spilled material or otherwise contain material to ensure runoff does not reach a waterway. Place material in appropriate container for disposal.

Precautions to prevent secondary hazards

Prevention of secondary hazards Clean contaminated objects and areas thoroughly observing environmental regulations.

7. Handling and storage

Precautions for safe handling

Technical measures/precautions: Wash thoroughly after handling.

Conditions for safe storage, including any incompatibilities

Technical measures and storage conditions: Keep containers tightly closed in a cool, well-ventilated place. Store below 30°C (86°F). Avoid excessive heat. Do not freeze.

Incompatible materials: No information available

8. Exposure controls/personal protection

Control parameters

Exposure Limits This product, as supplied, does not contain any hazardous materials with occupational exposure limits established by the region specific regulatory bodies.

Chemical name	New Zealand TWA	ACGIH TLV	Uk oes/mel:	Australia nohsc :
Anhydrous Glucose - 7625-23-2	-	-	-	-
Water - 7732-18-5	-	-	-	-

Biological occupational exposure limits This product, as supplied, does not contain any hazardous materials with biological limits established by the region specific regulatory bodies.

Chemical name	New Zealand	ACGIH
Anhydrous Glucose - 7625-23-2	-	-
Water - 7732-18-5	-	-

Appropriate engineering controls

Engineering Measures No special containment is required. Good general ventilation should be sufficient to control airborne levels.

Individual protection measures, such as personal protective equipment

Eye/face protection Eye protection not required for normal final product use. Safety glasses with side-shields are recommended for laboratory and manufacturing use.

Hand protection Use chemical resistant, impervious gloves.

Skin and body protection Work uniform or laboratory coat.

Respiratory protection No personal respiratory protective equipment normally required.

Environmental exposure controls No information available.

9. Physical and chemical properties

Information on basic physical and chemical properties

Physical state: Liquid
Appearance: Aqueous solution.
Color: Clear Solution, Free from Visible Particles
Odor: No information available

Eye contact: Not expected to cause eye irritation.
Skin contact: Not expected to cause skin irritation.
Ingestion: Not expected to be hazardous by ingestion.

Symptoms: No information available

Acute Toxicity

Numerical measures of toxicity

Component Information

Chemical name	Oral LD50	Dermal LD50	Inhalation LC50
Anhydrous Glucose 7625-23-2	-	-	-
Water 7732-18-5	> 90 mL/kg (Rat)	-	-

See section 16 for terms and abbreviations

Delayed and immediate effects as well as chronic effects from short and long-term exposure

Corrosivity: Not classified.
Irritation: Not classified.
Sensitization: Not classified.
Mutagenic effects: Not classified.
Carcinogenic effects: Not classified.

Chemical name	New Zealand	IARC
Anhydrous Glucose - 7625-23-2	-	-
Water - 7732-18-5	-	-

Reproductive toxicity: Not classified.
STOT - single exposure: Not classified.
Respiratory irritation Not classified.
Narcotic effects Not classified.
STOT - repeated exposure: Not classified.
Aspiration hazard: Not classified.

12. Ecological information

Ecotoxicity

No information available

Aquatic ecotoxicity

Unknown aquatic toxicity 0 % of the mixture consists of component(s) of unknown hazards to the aquatic environment.

Chemical name	Algae/aquatic plants	Fish	Crustacea

Anhydrous Glucose 7625-23-2	-	-	-
Water 7732-18-5	-	-	-

Terrestrial ecotoxicity

Chemical name	Earthworm	Avian	Honeybees
Anhydrous Glucose 7625-23-2	-	-	-
Water 7732-18-5	-	-	-

Persistence and Degradability

No information available.

Bioaccumulative potential

No information available.

Chemical name	Partition coefficient
Anhydrous Glucose 7625-23-2	-
Water 7732-18-5	-

Mobility in soil

No information available

Other adverse effects

This product does not contain any known or suspected endocrine disruptors.

Chemical name	EU - Endocrine Disruptors Candidate List	EU - Endocrine Disruptors - Evaluated Substances	Endocrine disrupting potential
Anhydrous Glucose 7625-23-2	-	-	-
Water 7732-18-5	-	-	-

13. Disposal considerations

Waste treatment methods

Waste from residues/unused products In accordance with local and national regulations

Contaminated Packaging In accordance with local and national regulations

14. Transport information

IATA Not regulated

IMDG Not regulated

15. Regulatory information

Safety, health and environmental regulations/legislation specific for the substance or mixture

New Zealand

National regulations See Section 8 for any applicable tolerable exposure limits and environmental exposure limits

Certified handlers, tracking and controlled substance licence requirements Certified handlers are required for some substances. This includes for substances requiring a controlled substance licence, including Class 1 explosives, vertebrate toxic agents (9.3A, B, C), and certain fumigants. Class 6.1A and 6.1B substances such as pesticides also require Certified handlers. Please check the Health and Safety at Work Act 2015 for further information.
Tracking is required for some highly hazardous substances. These substances need to be under the control of an appropriately trained person or appropriately secured. Please check the Health and Safety at Work Act 2015 for further information.
Controlled substance licences are required to possess certain class 1 (explosive) and class 6 (vertebrate toxic agents or fumigants) substances. See Part 7 of the Health and Safety at Work Regulation 2017 for more information.
