

# DermLite DL1

Among the many reasons why the first DermLite was such a remarkable solution is its portability and versatility. There was nothing that even came close to its compact, in-the-palm-of-your-hand footprint. Now, more than a decade later, it is time to integrate the innovations that make the top-of-the-line DermLite devices so convenient into a digital dermoscopy solution designed for your smartphone and even iPad.

To accomplish this feat, the designers squeezed a superb, full-size 15 mm lens that's optimized for iPhone and other smartphones and tablets, high-powered LED lighting and a high-performance rechargeable battery into the simply ingenious DL1, an all-aluminum design smaller than your ring finger that lets you capture high-resolution images of excellent clarity and sharpness in both polarized and non-polarized modes, with or without skin contact. Perhaps most importantly, you will be able to use DL1 with your smartphone right out of the box, and using it with a future generation smartphone will merely require the purchase of an inexpensive DermLite smartphone or iPad case.

## Medical and Surgical Requisites Pty Ltd

Call within Brisbane 07 3859 2900 33 Fulcrum Street Richlands Queensland 4077 [www.medsurg.com.au](http://www.medsurg.com.au)  
Phone 1300medsur (1300 633 787) Email [medical@medsur.com.au](mailto:medical@medsur.com.au) Fax 07 3859 2995

If that weren't enough versatility, its battery can be recharged from any USB port, the included AC charger, or even via your very own smartphone/iPad charger and, due to its unique lighting angle, it works just as well for ENT exams as it does for dermoscopy.

Each set includes a DermLite DL1 dermatoscope with lithium-ion battery, snap-on polarized spacer, snap-on non-polarized spacer, snap-on polarized pocket clip, glass faceplate with 10mm scale, smartphone case of choice, and a USB cable.

The all-new DL1. Highly compressed smartphone dermoscopy for iPhone and beyond.

About the size of a stick of gum

Takes superb images with your smartphone

May be used as a stand-alone dermatoscope

Clips to your shirt or your iPhone

Same lens size as the original DL100

Cross-polarized and non-polarized modes

Glass faceplate with 10 mm scale

Recharges from any Mac or PC, or via your Apple charger
