

Epaderm[®] Cream

The 2-in-1 clinically proven emollient and skin cleanser is now available through Medical and Surgical Requisites.

Epaderm Cream was developed to treat dry skin conditions and is an ideal cream for psoriasis and eczema. It provides all of the moisturising and protective benefits of paraffin-based emollients and can be used for all dry skin conditions.

- Non-greasy formulation absorbs quickly into the skin
- Is ideal for use as an emollient or a skin cleanser
- Suitable for all ages, including babies
- Kinder to skin with no colours or fragrances
- Can be used on all dry skin conditions
