

Surshield® Safety Winged Infusion and Blood Collection Sets

Help shield your staff against accidental needle-sticks with Surshield®

Terumo® Surshield® Safety Winged Needle Sets provide:

- One-handed*, easy-to-activate safety device
- Minimal steps for activation
- No change in needle insertion technique required
- Confirmation that needle is securely locked
- Minimize the risk of needlestick injuries

*Note: OSHA bloodborne pathogen standard 1910.1030(d)(2)(vii)(B)

Surshield® Safety Winged Needle Sets have the soft, flexible, interlocking wings that readily conform to body's contour. The needles are bonded to the wings at just under a 3° downward angle, for less risk of vessel damage or occlusion of the lumen. The coil-resistant tubing reduces recoil during use. Surshield® Safety Needle sets are DEHP free and have no components made of natural rubber latex.

How to Activate

1. Flip safety shield toward needle. Remove the needle and apply digital pressure to the site.

2. With the wing and shield between your thumb and index finger, press the safety shield against a hard surface such as a bedside table until an audible click is heard.

3. Visually confirm activation of the safety feature.

Based on IFU Rev. October 2008.

Surshield® Safety Winged Blood Collection Sets (with attached multi-sample luer adapter)

Packed: 50/box, 10 boxes/case (500)

Product Code	Description
